You
vaccinate.
Test hearing.
Monitor temps.
Screen eyesight.
You do a lot to give
your child a healthy
start. But when
you only concentrate
on physical health,
you're missing
half the picture.

What Families are Saying

I found it really helpful for the CCN to observe in the child care setting, where she was struggling the most.

The CCN helped me find ways to help my child without having to use medications.

The CCN explained that our child was normal, but we also learned ways to improve her behavior.
